Zanthoxylum oahuense	Endangered	PEPP			PEPP					

Designation Definitions All taxa listed above are prioritized by PEPP for surveys, monitoring, protection, collection, and outplatning

PEPP = Plant Extinction Prevention Program. Wild plants still extant.

EXTINCT in Wild = Wild founders extinct but held in cultivation and/or outplanted

EXTIRPATED in Wild. All known wild plants extirpated on the island, but collections from that island are held in cultivation and/or outplanted

Possibly EXTINCT = Not seen for over 20 years, habitat remains, some hope of discovery remains (refers to entire species). Target for surveys.

Possibly EXTIRPATED = Taxon not seen for over 20 years; habitat remains, some hope of discovery remains (refers to island-level extirpations). Target for surveys.

EXTIRPATED = Not located despite extensive searches, very little hope of discovery remains (refers to island-level extirpations)

EXTINCT = Not located despite extensive searches, very little hope of discovery remains
